Raw sausage

Cooked and scalded sausage

Acrylate aprons

Shopping bags

Cooked cured products

Textile casings present your products in the best possible way - careful manufacturing processes guarantee the highest quality. With and without printing, reels, bundles, pieces or shirred - the possibilities are numerous.

The new products "Nalo TX Green" and "Nalo TX Bamboo" belong to our **Green Family**.

NaloPex/V is a polyester fabric for special applications.

Also the area VAC = Value Added Casings - casings with an additional function offers new possibilities! Common to all casings is the problem-free filling behavior and the easy handling.

And one more point: Nothing is more important for a good product than a good service - our team of expert advisors will be happy to help you!

Have fun choosing and ordering!

Table of contents

Which Oskutex cover for what?	05
Raw sausage	
Unprinted textile casings	
Green Family: NaloTX Green & NaloTX Bamboo – bag form, wave-form, board form, knob-form, shirred	07–10
Printed textile casings	
Betex RS / BW – Flexotop, NaloTX FT Bamboo – craftsmanship, tradition and regionality	11
Designing should be fun	12
Betex RS – Texas Rancher, cord print, old recipe quality	13
„Wild & Strong“ – Bag-forms Betex RS	14
„Good Luck“ – special forms from Betex RS	15
Traditional printed motifs – printed covers made of BW-RS, Betex RS and ZW Flexotop	16
Attractive motifs and shapes – BW Flexotop, Betex RS, mold and BW-Flexotop mold	17–19
More luminosity and dynamics for your products – special shapes made of BW-RS and Betex RS	20
Historical motifs – cotton, Betex BW-RS, Betex RS	21
Actions – Promotion – Fire brigade and thank you	22

Raw Sausage

Semi-permanent

Scalded sausage

Cooked sausage

Cooked cured products

Note on filling quantities: The information on filling quantities is approximate. They are based on empirical values with commercially available recipes for raw, boiled or cooked sausage for the respective intended product application. In individual cases, the filling quantities may deviate significantly from these values despite the same textile casing specifications, depending on the customer-specific application, the recipe, the product to be filled or the processing methods. To determine exact filling weights, qualifying test fillings based on the customer-specific application are required beforehand.

TEXTILE CASINGS FOR RAW SAUSAGE

Authentic, classic and versatile

Raw sausage is at the top of the consumer's list and is one of the most popular sausages in the world. What's more, thanks to many different recipes, raw sausage has the status of a regional sausage specialty in many places. Local preferences often also determine the meat base used. Regardless of whether it comes from pork, beef or poultry, the seasoning and the special maturing process also have a significant impact on the character of the raw sausage and bring flavour to the consumer's table.

The "packaging" of a raw sausage should be as individual and imaginative as the contents.

The extensive range of sausage casings offers variety in shape and appearance and demonstrates the essential advantages of using a textile casing. The decisive arguments for a textile sausage casing are the easy availability, the simple packaging and the very good maturing properties. In addition, the textile casing is a modern marketing instrument and combines high-quality basic materials with creative design possibilities.

In the following, we will introduce you to the diverse and creative uses of the textile sleeve for your raw sausage production.

The illustrations of the casing colors on this printout are not color-compliant, as this offset print is not comparable with the filling process of the sausage products. In addition, the casing colors depend on the sausage meat used and the cooking process. The casing colors listed are only intended as a guide.

NaloTX Green

Product informations

Product description*

Sausage casings made from organically grown cotton

Technical data

Raw material: organically grown cotton

Application

Raw sausage production

Confectioning

Sections sewn or with clip and loop,
roll goods, shirred goods
Caliber 40–200, special shapes possible

Storage

Cool and dry in original sealed carton. Please refer to the corresponding product specification for exact storage information

Minimum shelf life

unoiled: 36 months
oiled with vegetable oil: 6 months

Processing information

Process product dry and plump
Maturing/smoking: application-specific

NaloTX Bamboo

Product informations

Product description**

Sausage casings made of textile fabric based on regenerated cellulose (viscose/cellulose wool) produced from bamboo fibers

Technical data

Raw material: rayon fabric based on bamboo fibers

* NaloTX Green: The base material is organically grown and sustainable

** NaloTX Bamboo: The base material is sustainable

The information provided herein is for general guidance only. The legally binding information for the respective article can be found in the corresponding product specification and declaration of conformity.

Cotton Cellulose

Product informations

Product description*

Sausage casings made from uncoated cotton or cellulose

Technical data

Raw material:
Cotton (BW): 100 % cotton fabric
Cellulose (ZW): 100 % cellulose fabric

Colors

nature, white, brown, red, black
Further colors on request

Application

Raw sausage production

Confectioning

Sections sewn or with clip and loop,
shirred goods, Caliber 40–250, different lengths,
extensives standard program, natural casing and special form

Print

Up to 6 colors printable on both sides. Individual printing requests, e. g. logos, are possible.

Processing information

Process product dry and plump
Maturing/smoking: application-specific

Storage

Cool and dry in original sealed carton. Please refer to the corresponding product specification for exact storage information

Minimum shelf life

unoiled: 36 months
oiled with vegetable oil: 6 months
oiled with paraffin oil: 12 months

NaloFashion

Product informations

Product description

Sausage casing based on cellulose hydrate, reinforced with fiber fleece

Advantages

- very good maturing properties
- uniform smoke transmission
- high mechanical strength
- impermeable to grease
- highest production quality
- individual appearance

Confectioning

Different shape seams: bubble, bag, Bocksbeutel, cap, bottle.
Caliber 55, 60, 65, 70, 75, 90, 105, 110 etc., different lengths

Colors

Nature

Print

Up to 6 colors printable on both sides.
Individual printing requests, e. g. logos, are possible.

Application

Suitable for smoked and air dried raw sausage and semi-durable.

Technical data

Raw material: regenerated cellulose, native cellulose

Storage

Cool and dry in original sealed carton. Please refer to the corresponding product specification for exact storage information.

Minimum shelf life

unoiled: 36 months
oiled with vegetable oil: 6 months
oiled with paraffin oil: 12 months

Processing information

Soak the product in lukewarm water (approx. 30 °C) for approx. 30 minutes before filling. Fill tightly with remote pressure and without air. Maturing/smoking: application-specific

TEXTILE CASINGS FOR COOKED AND BOILED SAUSAGE

Betex K/KD/KDB

Master quality for your product

In the case of cooked sausage, the initial ingredients are already cooked, are often complemented by fresh ingredients such as liver in liver sausage or pork blood for blood sausage, and are heated a second time. In the cooled state, they are firm to the bite and in some cases also spreadable.

In order for these sausage specialties to succeed, they are usually stuffed into a sausage casing for cooked and boiled sausage. Our BETEX line is excellently suited for this sausage range. They are made of textile carrier material with a special coating.

The individual natural shapes and looks make the product Betex K, KB and KDB versatile sausage casings, especially for cooked and boiled sausage production.

Decorative lacing seams in matching colors round off the handcrafted end product. The range includes a variety of colors and shapes, whose uses and applications for the production of cooked and boiled sausage are presented below.

You have the choice

Color and shape can be combined as you like.

The images of the casing colors on this printout are not color binding, because this offset printing is not comparable with the filling process of the sausage products. In addition, the casing colors depend on the sausage meat used and the cooking process. The casing colors listed are only intended as a guide.

Product informations

Product description

Sausage casing made of a textile fabric with a special coating

Applications

Sausage casing for the production of cooked and boiled sausage products

Technical data

Raw material: 100% rayon fabric
Betex K – basic product
Betex KD – refined surface in natural casing look
Betex KB and Betex KDB – higher barrier

Converting

Caliber 45–250, sections, stitched with clip and loop, shirred fabric, different lengths, extensive standard program, nature gut and special shapes

Colors

See color spectrum p. 76–79.
Further colors on request.

Print

Up to 6 colors printable on both sides.
Individual printing requests, e. g. logos, are possible

Storage

Cool and dry in original sealed carton
For detailed storage information please refer to the corresponding product specification.

Minimum shelf life

unoiled: 36 months
oiled with vegetable oil: 6 months
oiled with paraffin oil: 12 months

Processing instructions

Process the product dry and fill it tightly
Cooking/Broiling/Smoking: product specific

Touch and feel the difference – Betex casings with wax-coating.

PARCHMENT

Product informations

Product description

Smoke and water vapor permeable sausage casing made of real parchment

Advantages

- rustic look
- easy filling
- grease impermeability

Applications

Especially suitable for cooked sausages, also raw sausages and semi-durable products can be filled.

Technical data

Raw material: parchment

Converting

Cut-offs or bundles/rolls
Caliber 60 und 65

Colors

White-transparent

Print

not printable

Storage

Cool and dry in original sealed carton
For detailed storage information please refer to the corresponding product specification.

Minimum shelf life

6 months on the delivered product from production date of the OSKUtex GmbH

Processing instructions

In case of rolled products, please apply the sleeves dry to the desired lengths

Before filling, soak the product for approx. 5 min. in hand warm water (approx. 30 °C).

Raw sausage: fill tightly and free of air

Cooked sausage: fill loosely

Maturing/Cooking/Smoking: application-specific

The information given here is merely general product information. Due to the process, the colors shown do not necessarily correspond to the original. Legally binding information for the respective article can be obtained from the corresponding product specification and declaration of conformity.

VAC* TEXTILE

Casings and sheets – value added from the start

It is the One-Step process, which includes several steps together. This opens up many opportunities to develop new ideas and realize. Different mesh sizes and lacing seams for the Betex CFN round off the portfolio.

🔪 Production | Minimum order quantity: 25 pieces per variety

In addition to the items listed here, other sizes are of course available!

TexdaColor

Five steps to success

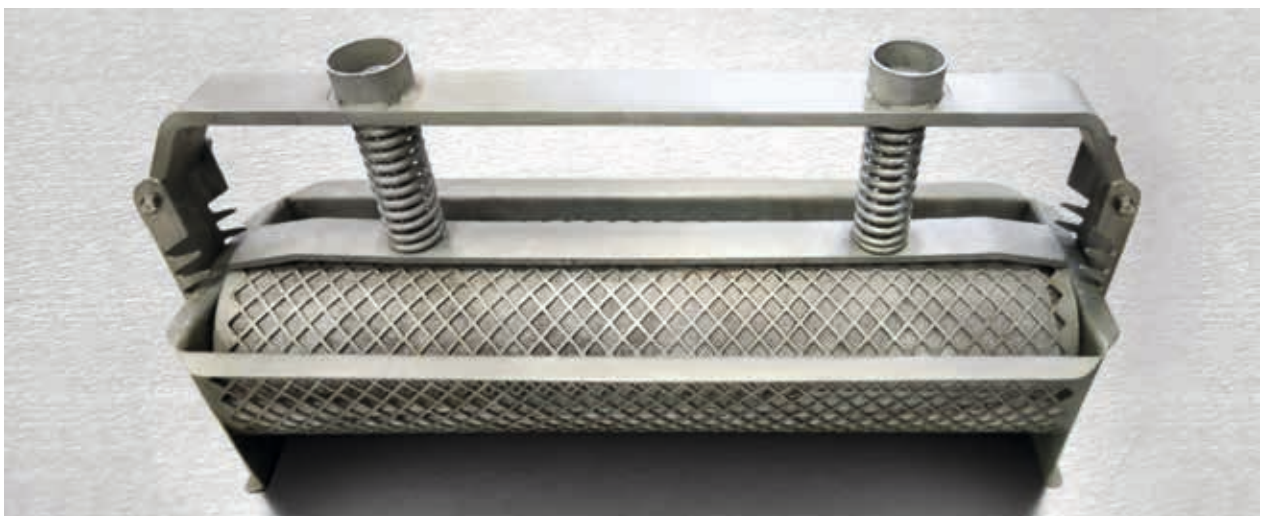

1. Prepare material

2. Place sheets in the mold

3. Insert/fill material

4. Close + cook

5. Final product ✓

TexdaCol

Product informations

Product description

Sausage casing with a gelatin coating and light smoke flavor for raw sausage

Technical data

Raw material: rayon fabric

Converting

cut, rolled or shirred

Caliber 40–120 mm, different lengths possible.

Colors

Casing not colored

Print

not printable

Storage

Cool and dry in original sealed carton

For detailed storage information please refer to the corresponding product specification.

Minimum shelf life

unoiled: 36 months

oiled with vegetable oil: 6 months

Processing instructions

Process the product dry and fill it tightly

Cooking/Broiling/Smoking: product specific

The information given here is merely general product information. Due to the process, the colors shown do not necessarily correspond to the original. Legally binding information for the respective article can be obtained from the corresponding product specification and declaration of conformity.

BETEX CF / CFN COOKED CURED PRODUCTS

Product informations

Product description

Casing with carry over function from food ingredients

Application

casing for all smoked and unsmoked cooked cured products

Technical data

Raw material: knitted fabric made of 100% polyamide

Betex CF: basic product

Betex CFN: equipped with decorative net

Converting forms

rolls, beads, bags sewn (round or square) with clip and loop, sheets

Caliber 60–150 mm for shirred envelopes, rolls and sections

special shapes up to caliber 230

Colors

depending on type, appearance and food: black, brown or transparent

Print

not printable

Storage

Cool and dry in original sealed carton

For detailed storage information please refer to the corresponding product specification.

Minimum shelf life

unoiled: 36 months

oiled with vegetable oil: 6 months

oiled with paraffin oil: 12 months

Processing information

Process the product dry and fill it tightly

Maturing/smoking: product-specific

The information given here is merely general product information. Due to the process, the colors shown do not necessarily correspond to the original. Legally binding information for the respective article can be obtained from the corresponding product specification and declaration of conformity.

NaloSpice

Product informations

Product description

Sausage casing with transfer functions of food ingredients.

Seasoning casings with a wide range of applications as a system solution for industrial processing „Adding Value by System Solutions“. Products with variety and high enjoyment for modern meat products with different spice variants.

Advantages

- uniform spice distribution on the finished product & standardization of the product
- improved appearance, aesthetic presentation of the product
- more efficient filling and manufacturing processes
- simple, safe handling
- one-step process for high process reliability
- very good slice properties after peeling
- increased production flexibility

Application

NaloSpice RS for raw sausage, semi-hard sausage and scalded sausage, cooked cured products, poultry products as well as pâtés with spice coating

Technical data

Raw material: textile carrier with spice coating

Converting

rolls, bags sewn (round or square) with clip and loop, sheets

Caliber ranges 55–130

Loops for cut goods;

sewn loops: see price list

Colors

cover not dyed

Spice specific color

Print

not printable

Storage

Cool and dry in original sealed carton

For detailed storage information please refer to the corresponding product specification.

Minimum shelf life

maximal 6 months

Processing instructions

Process the product dry and fill it tightly

Maturing/Smoking: product specific

Minimum order quantities

cut-off goods: 2 bundles á 10 pieces = 20 pieces

sheets: 2 bundles á 10 pieces = 20 pieces

Roll goods: 1 roll (10m/20m)

The information given here is merely general product information. Due to the process, the colors shown do not necessarily correspond to the original. Legally binding information for the respective article can be obtained from the corresponding product specification and declaration of conformity.

BACON-SHEETS – TEXDACOLOR

Product informations

Product description

Sausage casing with flavor/as well as color transfer coating

Application

Cooked cured meats

Technical data

Raw material: 100 % polypropylene fleece

Converting forms

available as sleeves or sheets

Taste and color transfer

Bacon flavor (Smoke Seasoning)

Color transfer

Eel smoke

Declaration

TexdaColor Smoke Seasoning F0030:
Smoke flavoring, burnt sugar syrup
(if used as colorant: E 150a)

TexdaColor Eel smoke:
Plant extracts, plant charcoal (E 153)

SWITCH TO THE GREEN FAMILY

The Kalle company headquarters in Wiesbaden – view from the Rhine side

Versatile specialized

Kalle, headquartered in Wiesbaden, Germany, is a leading global supplier of industrially produced sausage casings. The global pioneering position of the company was recognized in 2018 with the Business Press by the business press and the scientific community.

Kalle sees itself as the reliable and innovative partner for the meat and food industry – from industry and trade to the butcher's trade. To this end, Kalle combines a wide range of products and brands to offer customized and individual solutions from a single source. Whether made of cellulose, fiber, polymer or textile: Kalle realizes all shapes, functions and motifs.

With a configurable product portfolio, Kalle makes it possible to variably serve both classic applications and trend applications.

In addition, the Kalle Group offers its customers solution-oriented advice and individual customer service – directly from the experts on site.

Kalle is also a leading manufacturer of sponge wipes. These are used for household applications and in professional cleaning, but are also suitable for technical applications and problem solving. High absorbency, long durability and ecological sustainability: these three product properties are the hallmarks of the high quality of sponge wipes.

Your way to us

Kalle is represented worldwide and always available – personally and in new ways.

Our expert advice is at your disposal and looks forward to your inquiries.
