NaloTX GREEN – THE TEXTILE CASING MADE FROM ORGANICALLY-GROWN COTTON

Traditional cotton is a natural material. Beyond this, organically-grown cotton can be used to give products an ecological accent. From cultivation, through harvest to processing, organically-grown cotton is pure nature.

Today, ecological components play an increasingly important role in the eyes of many consumers. A distinct sense of environmental awareness – particularly when it comes to packaging, is therefore of great importance to the trade.

Our textile casing, NaloTX Green, is hence the perfect complement to your high-quality products.

THE ADVANTAGE TO YOU

Resonates positively with customers

Organic packaging ensures attention and better sales at the Point-of-Sale (POS)

Strong product presentation

Your product will be presented authentically with visual appeal.

High margin

There is no intensive price competition in the organic segment, which means higher sales prices are achievable.

Good image

You become a trendsetter in the industry and benefit from an improved company image.

NaloTX Green is the perfect answer to your customers' active environmental awareness!

PRODUCT INFORMATION

Product description / raw material

Textile casing made from organically-grown cotton

Diameter range

Diameter 40–200, special shapes possible

Colors

Nature. Depending on the processes applied, the colors will not always correspond with their original appearance.

Converted forms

Tied pieces, stitched shapes, reels
sewn with clip and loop
shirred strands with vegetable oil

Storage time

Dry, 24 months in original packaging,
for shirred strands with vegetable oil 6 months.
The same also applies to sheets and tied pieces

Minimum shelf life (MSL)

Organically-grown cotton: 24 months,
converted with vegetable oil: 6 months

Processing notes

Soaking: fill dry
Filling: fill to bulging, optional smoking
Storage: cool and dry (in original packaging)
Maturing and smoking: product specific

Food safety

NaloTX Green Casings conform to the requirements of Sections 30 and 31 of the German Food, Commodities and Feed Code (LFGB), to Article 3 of the Regulation (EC) No. 1935/2004 and the European Regulation (EC) No. 2023/2006.

¹⁾ Only the base material is organic cotton,
not the labeled conversion
